Does a word help a child read a character?

Read the report

In a 2021 reading assessment, one child could read only the simplest characters on their own, but knew more of them inside words.

on its own
líng ‘age’

inside a word
nián líng ‘age’

Undergraduate project, Shenzhen, 2021. Xiaochuan Li, with the Shenzhen Learning Disorders Association. The characters are examples, not test items.
